FINAL EVALUATION

FINAL PORTFOLIO, STRATEGY PRESENTATION, AND REFLECTION REPORT

PAPER TRADING REPORT

Student Name : P.Indhu Mathumitha
Programme : II B.Com(Honours)
College : Kamaraj College
Trading Platform : TradingView Paper Trading
Trading Period : 9 July 2026- 2 October 2026
Date of Submission :31.10.26

INTRODUCTION

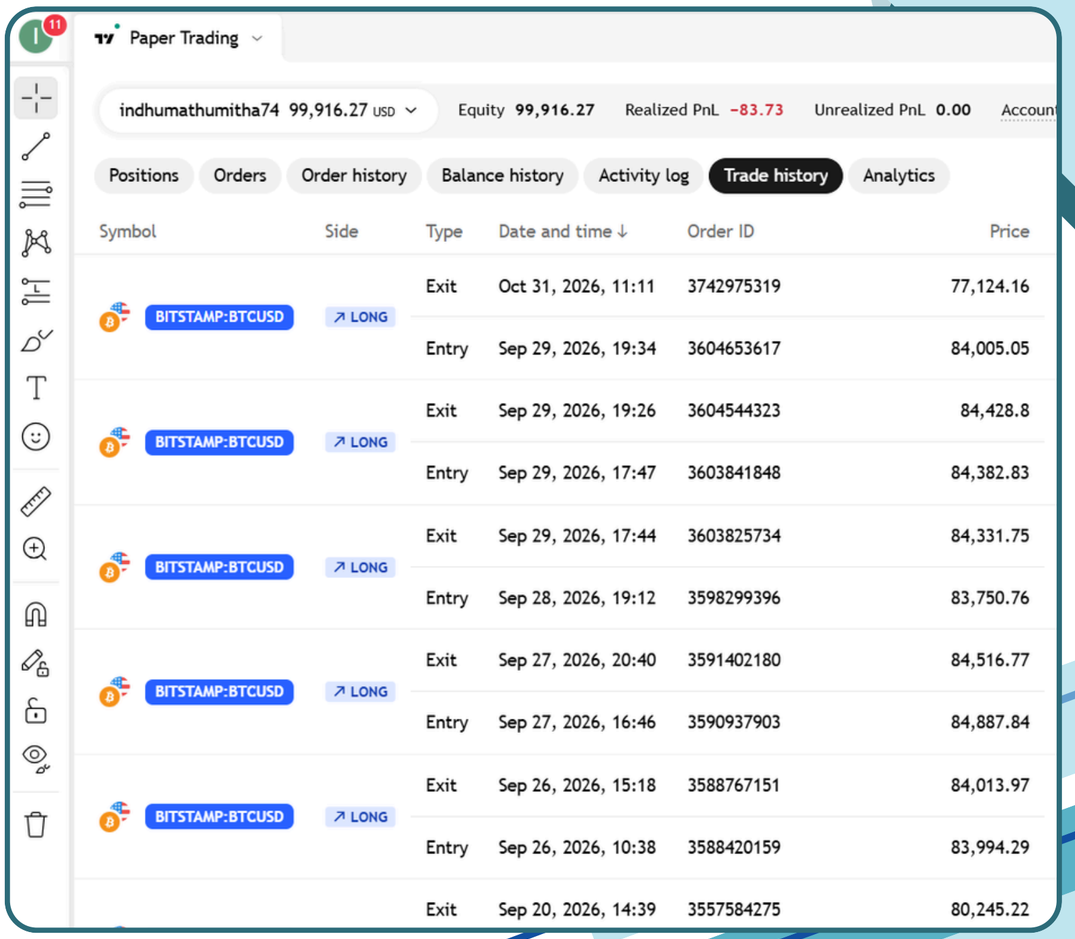

Paper trading is a practice activity that helps students learn trading without using real money. I used TradingView Paper Trading to practise buying and selling cryptocurrencies. During this programme, I traded Bitcoin and other cryptocurrencies using LONG positions. I followed a Consistency Strategy and observed market movements. The purpose of this report is to explain my trading performance, strategy, mistakes and learning experience.

PORTFOLIO OVERVIEW & PERFORMANCE

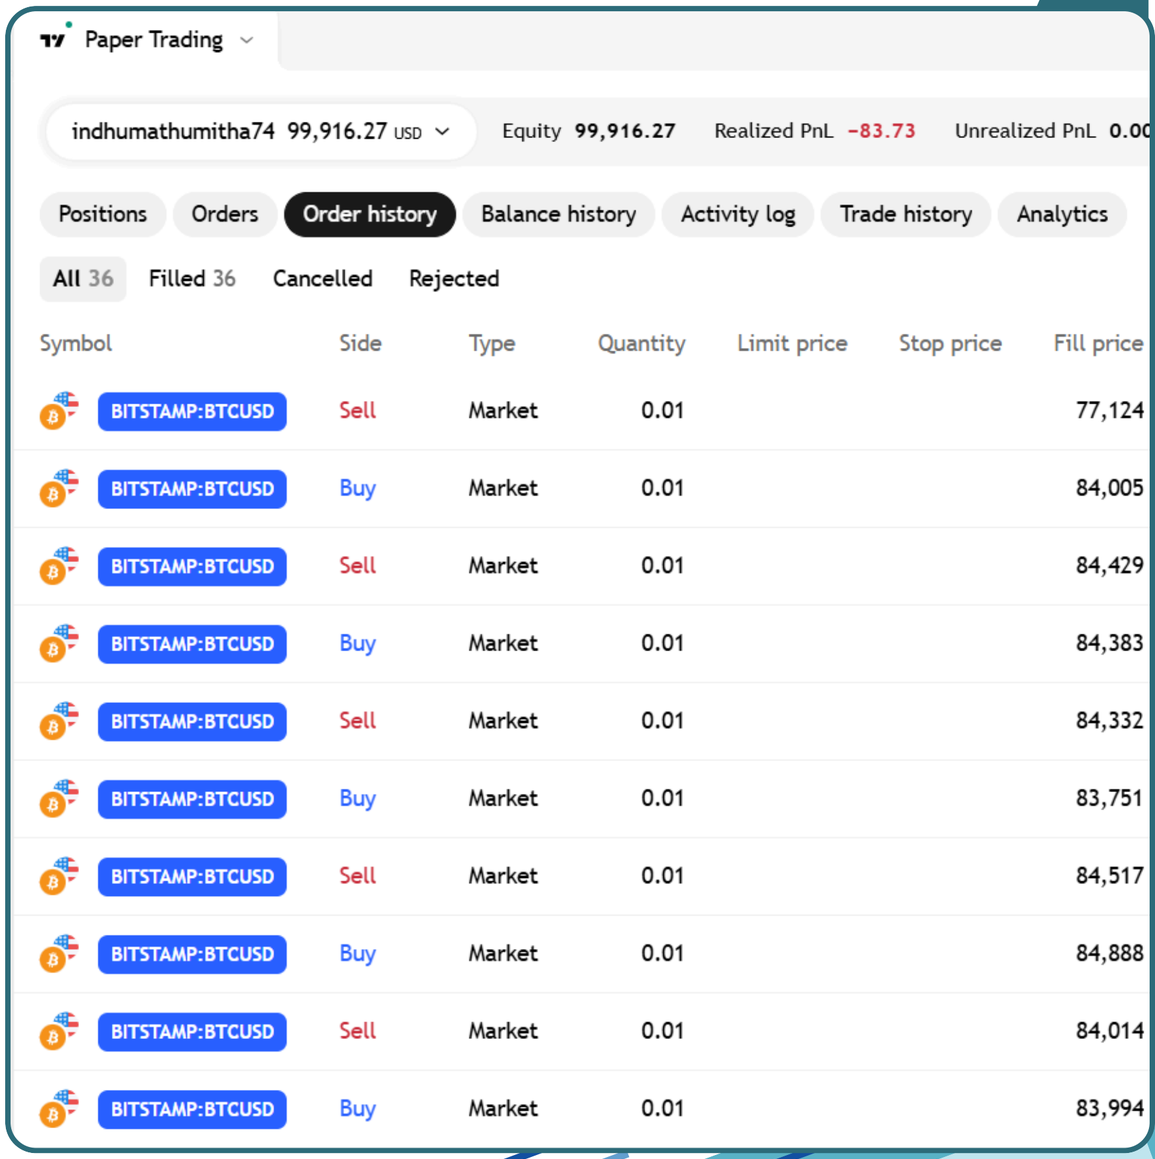

Portfolio Snapshot :

My paper trading account was created using TradingView with an initial virtual balance of $100,000. I practised trading Bitcoin and other cryptocurrencies during the programme. My account balance was $99,985.08, and my equity was $99,916.27. The realised P&L was -$83.73, and the unrealised P&L was 0.00. My account showed one open position with a trade size of 0.01 BTC. These figures helped me understand my overall trading performance.

Overall Portfolio Performance

Portfolio Measure	Final Result
Total Trades	17
Closed Trades	17
Open Trades	0
Profitable Trades	8
Losing Trades	9
Realised P&L	-83.73
Unrealised P&L	0.00
Trading Period	9 July - 2 October 2026

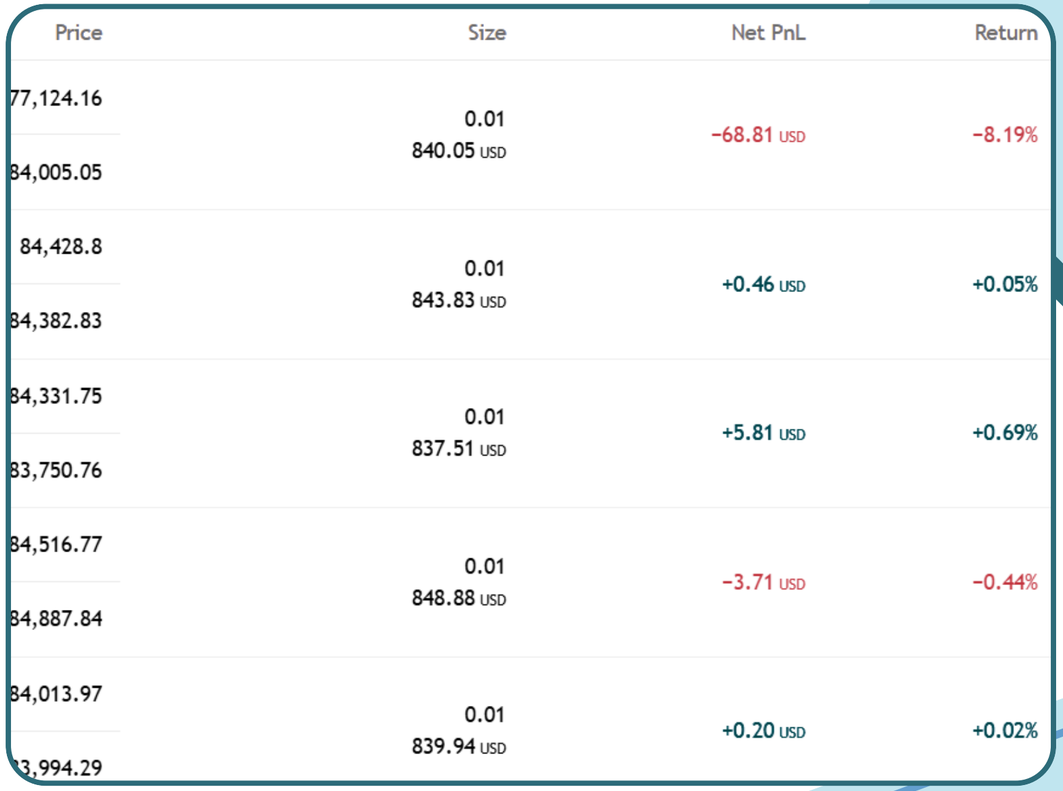

Factors Influencing Performance

Market movements played an important role in my trading performance. Cryptocurrency prices changed frequently during the trading period. Entry and exit timing also affected my results. Holding trades for too long was one of my common mistakes. I understood that proper planning, patience and risk management are important for improving trading performance.

Process vs Outcome

My trading experience helped me understand the difference between the trading process and the final outcome. Although some trades generated profits, my overall portfolio showed a loss. I learned that following a proper trading plan is more important than focusing only on profits. I need to improve my entry decisions, exit timing and trading discipline.

Price	Size	Net PnL	Return
77,124.16 84,005.05	0.01 840.05 USD	−68.81 USD	−8.19%
84,428.8 84,382.83	0.01 843.83 USD	+0.46 USD	+0.05%
84,331.75 83,750.76	0.01 837.51 USD	+5.81 USD	+0.69%
84,516.77 84,887.84	0.01 848.88 USD	−3.71 USD	−0.44%
84,013.97 83,994.29	0.01 839.94 USD	+0.20 USD	+0.02%

TRADING STRATEGY & APPLICATION

Strategy Overview

I followed a Combined Strategy using RSI, SMA and Trend Strategy during my TradingView Paper Trading activity. RSI (Relative Strength Index) helps to identify whether the market is overbought or oversold. SMA (Simple Moving Average) helps to understand the average price movement. Trend Strategy helps to identify whether the market is moving upward or downward. I combined these methods to understand market movements before making trading decisions. This helped me improve my trading knowledge, patience and consistency.

Application of the Strategy

I applied the combined strategy using RSI, SMA and Trend Strategy in TradingView Paper Trading. I observed the RSI indicator to understand market conditions and used SMA to check average price movements. I also followed the market trend before entering a trade. I mainly practised LONG positions and checked the entry and exit prices. This helped me understand how to apply these strategies in trading and improve my decision-making.

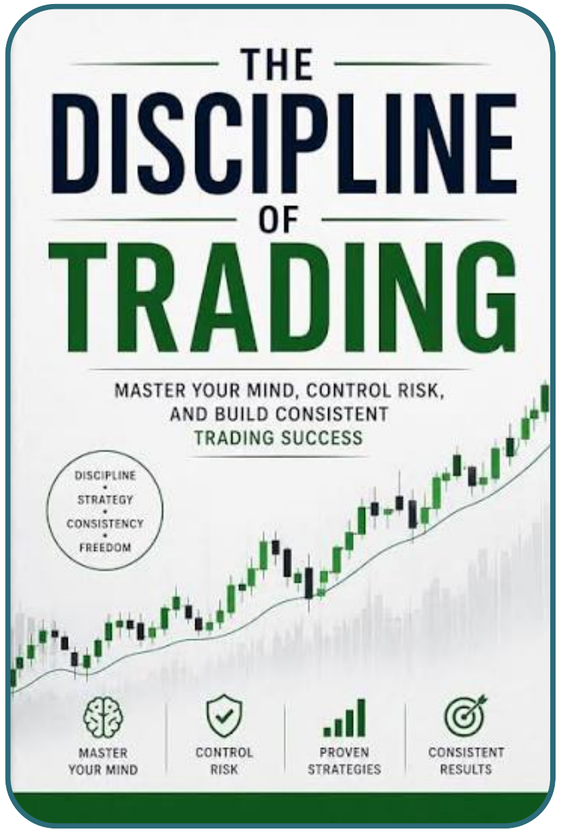

Representative Trade Examples

Particulars	Details
Asset	BTCUSD
Trade Type	LONG
Entry Price	61,882
Exit Price	63,953
Entry Date	9 July 2026
Exit Date	10 July 2026
Profit	+20.71
Return	+3.35%

Trading Discipline

- Planning is important for successful trading.
- Patience helps in making better decisions.
- Proper execution improves trading performance.
- Risk awareness helps to control possible losses.
- Emotional decisions can affect trading results.
- Reviewing mistakes helps to improve future trades.

Overall Strengths

STRENGTH

Market Observation : I regularly observed cryptocurrency price movements using TradingView charts.

Example: I checked the BTCUSD chart to understand price changes.

Areas for Improvement

Exit Timing: I sometimes held trades for too long and need to make exit decisions at the correct time.

Example: I need to avoid holding a trade longer than planned.

Improvement Across the Programme

Learning from Mistakes: I became more aware of my mistakes and understood the importance of patience and consistency.

Example: I identified holding trades for too long as an area that needs improvement.

OVERALL EVALUATION

TradingView Paper Trading

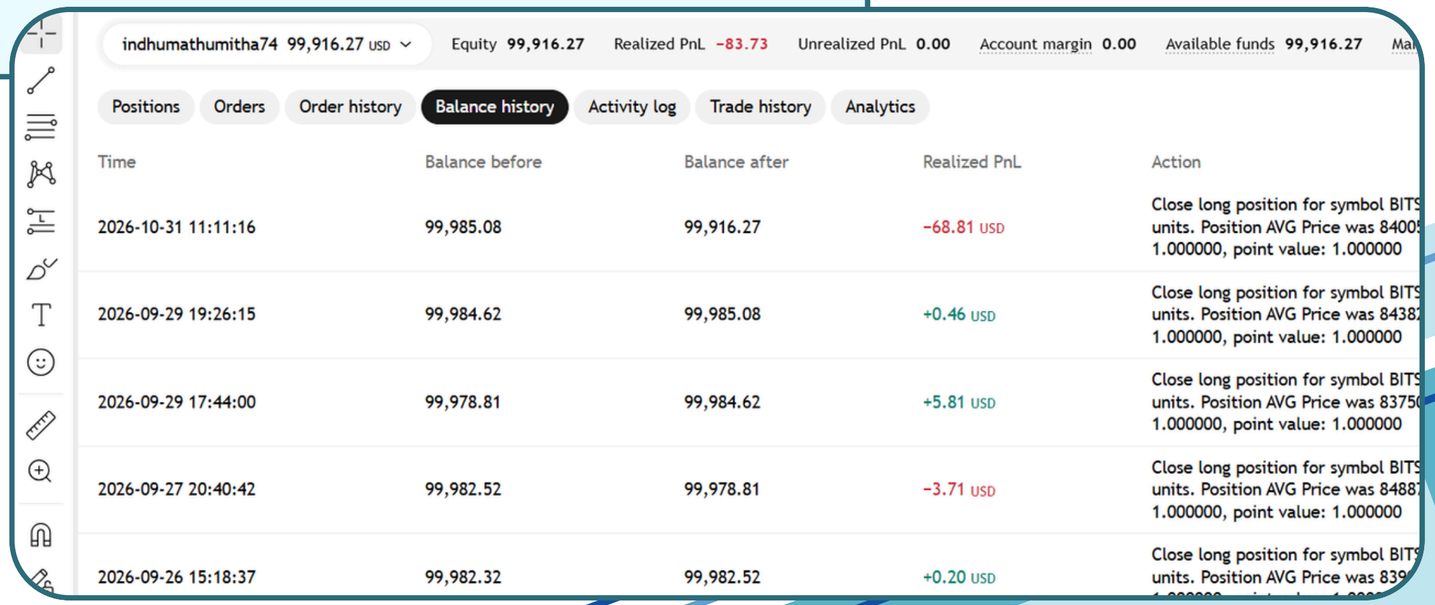

My overall experience with TradingView Paper Trading was useful and helped me understand cryptocurrency trading. I made several LONG and SHORT trades. Some trades gave me profits, while some resulted in losses. I accepted both profits and losses and continued learning from my mistakes. I understood that patience is very important in trading. This project taught me to make careful decisions, follow a proper trading plan and maintain discipline and consistency.

SUPPORTING PORTFOLIO EVIDENCE

Account Summary

The account summary shows my overall paper-trading account performance.

- Initial Virtual Balance: $100,000
- Current Account Balance: $99,916.27
- Equity: $99,916.27
- Realised P&L: -$83.73
- Unrealised P&L: $0.00
- Available Funds: $99,916.27

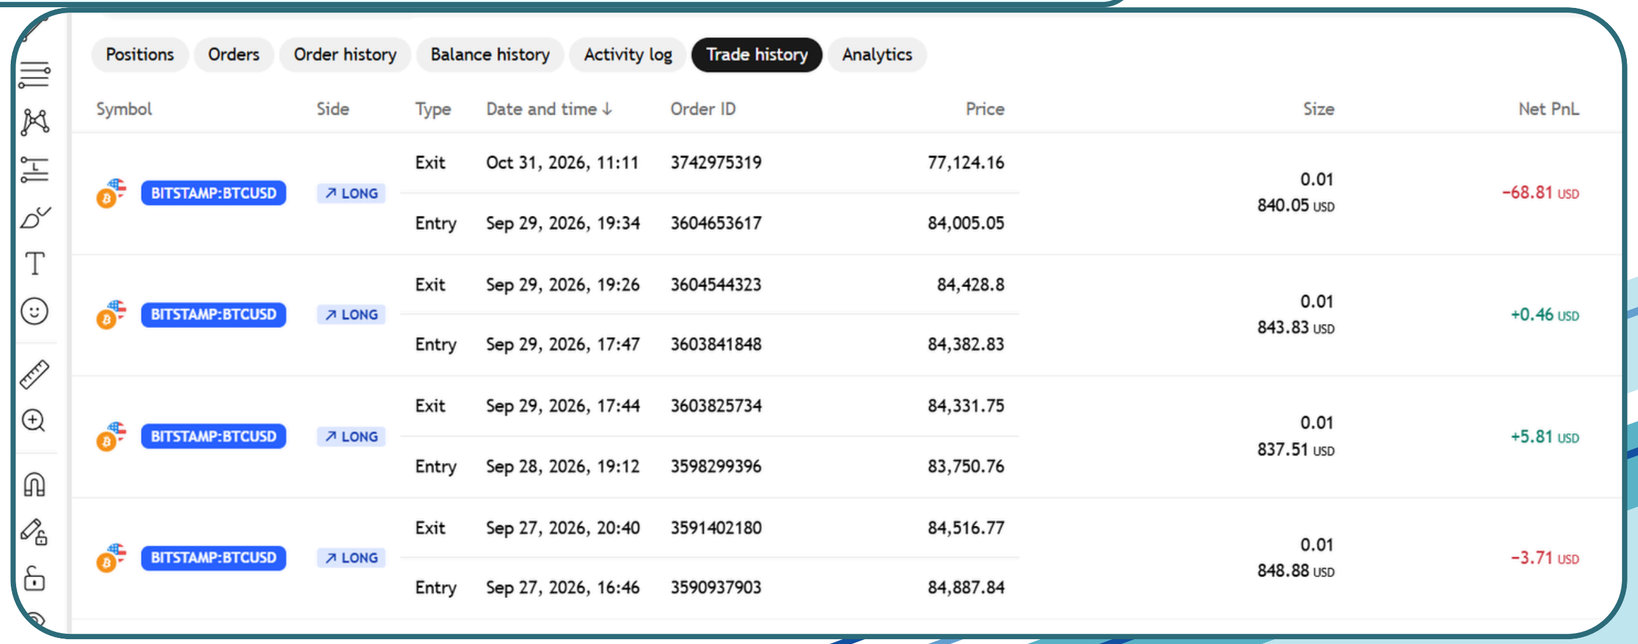

SUPPORTING PORTFOLIO EVIDENCE

Account Hidtory

The trade history shows my completed transactions, including trading symbols, entry and exit dates, prices, trade sizes and profit or loss.

- I mainly traded Bitcoin (BTCUSD).
- I also traded Ethereum (ETHUSD) and Solana (SOLUSD).
- Some of my trades resulted in profits, while others resulted in losses.
- I reviewed the results of my trades to understand my performance.

CONCLUSION

The paper trading project gave me practical knowledge of cryptocurrency trading. I learned how to observe market movements, analyse trades and evaluate portfolio performance. I identified my mistakes, especially holding trades for too long. This experience taught me the importance of consistency, patience and risk management. I also understood that both profits and losses are part of the learning process. I will use these lessons to improve my future trading decisions.

THANK YOU
